

Public Comment

1. Review of past contract(s) and what was provided for the monies received; in particular, identification of critical roles BLDC plays in administration of BSB loan funds and economic development activities.
2. Review of existing economic development efforts and planned efforts.
3. Discussion on alternatives moving forward. This discussion would include but not be limited to the following options, "no action" i.e. we would continue the contract as it has been in the past; all the way to cancellation of the contract altogether, which would require that BSB take on a number of management tasks that the BLDC currently provides (i.e. loan review/administration). Again, these are the two options on the ends of the spectrum; I anticipate us cooperatively coming up with an alternative in between.
4. Recommendations for next steps
